

WHAT IS A GARDEN MASTER?

The Garden Master "Elite" System is an Aerated Wastewater Treatment System (AWTS) that efficiently treat's and recycles all wastewater from your home. Designed by our team of wastewater industry experts, the Elite system is a single concrete tank with a ten-person capacity, perfect for most domestic situations.

The Garden Master Elite System is a cost-effective and environmentally friendly solution for your home. The system receives all waste from the house including the kitchen, toilet, shower and laundry, and quietly and efficiently recycles all your household wastewater into clean, clear and odorless water suitable for irrigation on your garden and lawns.

THE GARDEN MASTER BENEFITS

- Environmentally friendly
- Saves household water usage by up to 50%
- Cost effective
- Durable concrete construction
- Microcomputer control unit

MAKE YOUR HOME
ENVIRONMENTALLY FRIENDLY

WHY CHOOSE GARDEN MASTER?

Garden Master is one of Australia's most successful manufacturers and suppliers of AWTS's. For over 30 years, we have been providing reliable sewage treatment in both domestic and commercial installations. For each system we install, we service and monitor their performance through a statistical product testing program.

The Garden Master "Elite" System has been professionally designed by our experienced team and then manufactured at our own factory so we can be sure that our exacting standards are being met.

Do not compromise on quality, your family deserves the benefit of the Garden Master Elite.
